

# Sanitation Container Guidelines

- Bag and store all garbage and small trash in your Roll-Out Cart.
- Place your Roll-Out at the rear of your residence after being emptied.
- The Roll-Out should be kept closed to keep out water and neighborhood pets.
- The following items may **Not** be placed in your Roll-Out: *liquids, poisons, acids, caustics, ashes, paint, dirt, rocks or other dangerous materials such as gas, kerosene, oil, paint thinner or any type of construction materials.*
- Place your Roll-Out and Recycle Bin at the curb of your residence by 7:00 a.m. on your regular collection day.
- Roll-out must be placed at least four feet (4') from other objects (mail boxes, recycling bins, utility poles, parked cars, etc.) to avoid possible damage from the automated truck arm.
- Return your Roll-Out and Recycle Bin after they have been emptied to the rear of your residence by 7:00 p.m. on the day of collection.
- The City will **Not** pick up debris from contracted tree removal or contracted yard work.
- For families who need it, a second Roll-Out is available from the Public Works Department; however, there will be an additional charge on your monthly utility bill.
- If you have questions about containers or schedules, please call the Public Works Department at **684-7172** ext. 231.
